

Update of PDF-Mapper configuration from version 1.7.6 to version 1.8.0

No.	Description	
1	<p>The PDF-Mapper start screen shows a message that the configuration settings should be updated.</p> <p>Clicking on the button takes you directly to the application settings.</p>	
2	<p>Please note the information in the red box at the top right.</p> <ol style="list-style-type: none"> 1. Create backup - can be ignored if you have already created a current backup. 2. Then please select the desired document types that you want to process under <i>Configure document types</i>. Your current settings have been transferred. Please check or adjust the settings for each document type by clicking on the respective <i>Settings</i> and <i>Validation settings</i>. Save and activate your changes by clicking on <i>Save</i>. <p>Note: You can remove the red box at any time by clicking the [x] in the box at the top right.</p>	
3	<p>Configure document types:</p> <p>Please configure the desired document types that you want to process. Your current settings have been transferred.</p> <p>For example, if you only process orders, simply uncheck the "use" box for all other document types.</p> <p>Note: If you are unsure, leave the settings as they are.</p>

<p>4</p>	<p>Please check or adjust the settings for each document type by clicking on the respective <i>Settings</i>.</p>	 <p>The screenshot shows the 'Settings' window in PDF-Mapper. On the left, there is a 'My Settings' sidebar with buttons for 'Company details', 'Configure document types', 'Settings Order', 'Validation settings Order', and 'Settings Invoice'. The main area is titled 'Settings' and contains a 'Document Type' dropdown set to 'M_ORDERS'. Below it are various configuration fields: 'Input channel' (Local directory), 'Input directory for PDF data to be processed' (data\in\pdforders), 'Output directory for extracted data' (data\out\orders), 'Save PDF documents additionally in the output directory' (no), 'Name for extracted data' (PDF-filename.xml), 'Output format for extracted data' (XML), 'Output encoding for extracted data' (UTF-8), 'Backup folder for incoming data' (data\backup\orders), 'Directory for incorrect data' (data\error\orders), 'Sender address from master data' (do not use), and 'Recipient address from master data' (do not use). 'Cancel' and 'Save' buttons are at the bottom.</p>
<p>5</p>	<p>If you use validation, please check or adjust the validation settings for each document type by clicking on the respective <i>Validation settings</i>.</p>	 <p>The screenshot shows the 'Validation settings' window in PDF-Mapper. The 'Document Type' dropdown is set to 'M_ORDERS'. The 'Routing' dropdown is set to 'Output in validation error directory'. Other fields include 'Output directory for data with validation errors' (data\out-validation-error\orders), 'Output directory for test data with validation errors' (test\data\out-validation-error\orders), and 'Send message at validation error' (No). 'Cancel' and 'Save' buttons are at the bottom.</p>
<p>6</p>	<p>Finally, please save and activate your changes by clicking on the <i>Save</i>.</p> <p>It may take a moment to update the settings.</p>	 <p>The screenshot shows the PDF-Mapper interface with an 'Activate settings' dialog box overlaid. The dialog box contains the text: 'Please wait for the changed settings to take effect.' The background settings window is dimmed.</p>
